DETAILED ACTION

Response to Arguments

1. Applicant's Request for reconsideration and arguments filed December 4, 2008 have been fully considered but they are not persuasive.
2. Applicant argues that Hopkins (U.S. Patent No. 2,257,715) does not disclose screw threads and that the lid cannot be screwed on. However, since the lid can be rotated off it can be rotated on (Page 1, Column 2, Lines 2-4). As shown in Figure 1, there are the same amounts of ribs 24 as ridges 16 so the lid can be easily screwed on. The ridges 16 and 38 are considered screw threads since they hold the lid in place as well as guiding the lid in a rotating manner. The projection 40 would indicate the lid is sufficiently closed since once the lid has been rotated past that point, the lid is considered closed.
3. Therefore, the rejection for Claims 1-6 is upheld.
4. See Non-Final Rejection filed September 4, 2008 for more details on the rejection.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3781

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
